Hyunsoo Lee

Ph.D. in Data Science [Google Scholar] Postdoctoral Researcher - Interactive Computing Lab M hslee90@kaist.ac.kr 🏡 https://hslee90.github.io

I design human-centered systems for care, privacy, and wellbeing developing interactive technologies that support users, inform responsible data practices, and engage with real-world challenges in digital health and AI

RESEARCH **INTERESTS**

- Usable Privacy and Security
- Interaction Design in Digital Health & Wellbeing
- Human-AI Interaction in Sociotechnical Systems
- Context-Aware Computing in Ubiquitous Environments

EDUCATION Korea Advanced Institute of Science and Technology (KAIST)- Daejeon, Korea

· Ph.D in Data Science

Sep 2019 - Aug 2023

- Adviser: Uichin Lee
- Thesis: Exploring User-Friendly Data Privacy Support in Multimodal Sensor-Based Digital Healthcare Contexts
- M.S. in Knowledge Service Engineering

Sep 2017 - Aug 2019

- Adviser: Uichin Lee
- Thesis: Online behavior change support systems with commitment devices: a case study

Chungnam National University - Daejeon, Korea

• B.A. in School of English Literature & International Economics

Mar 2009 - Aug 2013

• GPA: 4.35/4.50 (Graduate Cum Laude)

WORK **EXPERIENCE**

Postdoctoral Researcher at KAIST - Daejeon, Korea

Sep 2023 - Present

- Understanding and conceptualizing collaborative privacy control in smarthome
- Designed and evaluated informatic systems supporting mental health (personal/family)
- Conducted LLM-based interaction studies to understand user perceptions of AI privacy risks

Previous Research & Industry Experience

Researcher at KAIST - Daejeon, Korea

Oct 2015 - Jun 2016

Instructional platform contents design and DB analysis

Research Intern at KIRD - Daejeon, Korea

Jan 2014 - Jan 2015

• R&D platform DB analysis

Intern at TripVi (Startup)- Seoul, Korea

Aug 2013 - Dec 2013

· Mobile UI/UX design and market data analysis

HONORS & **AWARDS**

■ Special Recognition for Outstanding Reviews (ACM CHI)	Dec 2024
■ Special Recognition for Outstanding Reviews (ACM CHI)	Dec 2023
■ Outstanding PhD Student of the year, Graduate School of Data Science	Dec 2022
■ Outstanding TA for Education4.0 Program at KAIST (Spring semester)	Sep 2022
■ Outstanding PhD Student of the year, Graduate School of Data Science	Dec 2021
■ Outstanding PhD Student of the year, Graduate School of Data Science	Dec 2020

Human-Centered System Design for User Security and Privacy in the Era of Multimodal TALKS Sensing

Jul 2025

- Early-Career Researcher Session, KCC'25
 - Introduced my recent research on designing human-centered systems that support usable security and privacy in ubiquitous, sensor-rich environments

An Empirical Study on LLM-Driven Privacy Attacks and Assessing Privacy Risks Feb 2025

- Multi-Modal AI Safety Benchmark Workshop, IEEE BigComp'25
 - Introduced privacy threats in LLM interactions and interface implications for user trust

User-Friendly Privacy Design in Ubiquitous Computing

Jun 2024

- PhD Forum, KCC'24
 - Discussed human-centerd privacy design for context-aware computing

Supporting User Data Privacy in Digital Healthcare Systems

Apr 2024

- Graduate Scool of Information Science, Yonsei University
 - Shared technological strategies for user empowerment in health-related data privacy

Enhancing UX in Security & Privacy for Multi-Modal Environment

Nov 2023

- Security & Privacy Team, Samsung Research
 - Introduced interaction design approaches for privacy-preserving smart environments

Applying Human-Centered Design to Security & Privacy Research

Nov 2023

■ Graduate School of Convergence Security, Sungkyunkwan University

• Introduced HCI-driven approaches to usable security in sociotechnical systems

Privacy and Security in Ubiquitous Computing Contexts

May 2022

- Graduate School of Computing, Chungnam National University
 - Shared research overview of user-centered privacy in sensor-rich environments

Understanding User Experiences in Behavior Change Support Systems

Feb 2022

- Outstanding paper presentation, HCI Korea'22
 - Presented empirical findings on goal-setting and user engagement in persuasive systems

TEACHING EXPERIENCE

- Co-Instructor, Human-Computer Interaction (KAIST CS Dept, Fall 2023)
- Teaching Assistant, Human-Computer Interaction (KAIST CS Dept, Spring 2022)
- Teaching Assistant, Human-Computer Interaction (KAIST CS Dept & Industrial System Engineering, Spring 2021)

SUPERVISION & MENTORSHIP

■ Youngji Koh (Ph.D. Student) - KAIST, Mar 2023 - Present

- Co-led the design and implementation of a domestic informatics system for mental health
- · Advised on statistical/qualitative analysis and research writing; paper accepted to IMWUT'25
- Seolyeong Bae (Undergraduate) GIST, Jun 2023 Aug 2023
- Guided mobile app design for contextual user consent interaction
- Mentored on user study method; paper published at CHI'24
- **Emily Law (M.S. Student)** KAIST, Jan 2023 Jun 2023
- Guided mobile app design for contextual user consent interaction
- Supervised user study and master's thesis development
- Hyesoo Park (M.S. Student) KAIST → Georgia Tech, Mar 2022 Present
- Guided the design and implementation of informatics system for child development
- Advised on qualitative analysis and research writing; paper under revision
- Seheon Kim (Undergraduate) KAIST, Jun 2022 Aug 2022
- Guided the living lab design for IoT-based health data collection
- Mentored on research ideation and user study methods
- Juhwan Yong (Undergraduate) Kangwon National University, Jun 2022 Aug 2022
- Guided the living lab design for IoT-based health data collection
- · Mentored on research ideation and user study methods
- Jinhyuk Jang (Undergraduate) KAIST, Jan 2022 June 2022
- Mentored the design of privacy-aware data visualization for wearable sensors
- · Advised on user study and research writing; paper published at KCC'22
- Youwon Shin (M.S. Student) KAIST, Apr 2021 Dec 2022
- Co-led the design and implementation of a family informatics system
- Supervised user study and master's thesis development

FUNDED RESEARCH PROJECTS

(* indicates role as PI or lab-level project manager)

Digital Healthcare & Human-Centered Informatics

■ Mental Health Measurement and Preemptive Care Technology Research in Smart Homes

- * LG Electronics | Mar 2024 Present | Collaborator
- Participated in the development of *LifePensieve*, a domestic health informatics tool for mental healthcare
- · Analyzed smart home behavioral data and its correlation with emotional wellbeing

■ Smarthome Technology to Support Healthy Family Life

- * Hanssem Co., Ltd. (Home appliances and Furniture), Apr 2021 Mar 2024 *
- Built a living lab-based IoT data pipeline for real-world sensing at home
- Designed and developed *FamilyScope*, a sensor-based family informatics system that enables reflection of a family's affective states and social interactions
- Co-designed SELaD, a system that supports children's social-emotional learning

■ Non-Face-to-Face Treatment Platform for the Depression Management

- * Ministry of Science and ICT | Apr 2021 Dec 2021 | Collaborator
- Designed and developed *PriviAware*, a mobile app supporting contextual consent and interactive data exploration to enhance user privacy awareness
- Focused on balancing usability and privacy in digital healthcare platforms

Privacy-Enhancing Interaction & Ethical AI

■ Development of Digital Innovative Element Technologies for the Early Prediction of Complex Diseases and the Expansion of Telemedicine

- * Institute for ICT Planning & Evaluation (IITP) | Apr 2025 Present | Collaborator
- Designing and simulating attack scenarios in multi-agent environments
- Developing a security framework for multi-agent system attacks

■ Constructing Multimodal Benchmark Dataset for AI Safety

- * Telecommunications Technology Association (TTA), KAKAO | Oct 2024 Dec 2024 *
- Developed a privacy-aware framework for curating multimodal datasets
- Developed security protocols and risk assessment guidelines for ethical dataset construction

■ Developing User-Driven Interpersonal Data Management Systems Supporting Group-Based User Privacy for Multimodal Sensor-Based Digital Healthcare Services

- * National Research Foundation of Korea (NRF) / New York University (NYU) | Sep 2023 Present *
- Conducted user research on group-based privacy expectations in shared healthcare settings
- Introduced OurData, a data-sharing framework enabling collaborative privacy control

Positive Computing & Persuasive Interaction

■ Development of Contextual Big Data Collection Technology based on Crowdsourcing and Large-Scale Public Datasets

- * National Research Foundation of Korea (NRF) | Oct 2019 Mar 2021 *
- Designed privacy-preserving persuasive interfaces for data contribution
- Conducted in-the-wild user study (N=100) to explore users' privacy concerns

■ Development of Persuasive Interaction SW Source Technology and Platform for Positive

Computing

- * National Research Foundation of Korea (NRF) | Oct 2018 Jun 2021 | Collaborator
- Participated in the development of *GoldenTime*, a persuasive mobile system for timeboxing and mindful device use
- Contributed to *LocknType*, a proactive intervention prompting task-based lockout for app avoidance

ACTIVITIES Academic Service

- Reviewer: ACM CHI (2021-2025), ACM UbiComp (2024-2025), ACM UbiComp/ISWC Poster/Demo Track Committee member (2025), ACM CSCW (2023-2024), Human-Computer Interaction Journal (2022), ACM MobileHCI (2020)
- Session Chair: ACM CHI 2024 Privacy in Real Contexts

Community & Committee Involvement

- **Contributor:** *AIAAIC* (AI, Algorithmic and Automation Incidents and Controversies) (Jun-Sep, 2024)
- Committee: HCI@KAIST (2022)

SKILLS Research Methods

• Usability Testing, User Studies, Qualitative Analysis (e.g., thematic coding), Statistical Analysis (SPSS, R)

Programming & Data Analytics

• Python, R, Prompt engineering (for LLM)

Design

• Figma
